-----

Output Cable Length: About 100mm, Arc Discharge Distance: 10mm~20mm. ?The input voltage is DC 6V to 12V and will output 1000kV high voltage. Recommended battery capacity is ...

A 1000kV DC inverter stands at the forefront of this revolution, enabling seamless energy conversion for sectors like renewable energy, industrial manufacturing, and grid infrastructure. Let's break down ...

Check each product page for other buying options. Need help?

Produit conforme et fonctionnel. L'ajustement de la carte r#233;clame quelques essais sans la notice! Sinon, l'clair est le bruit sont tr#232;s impressionnants!! Il est dommage que la batterie ne sois pas fournie &#224; ce ...

These devices convert low voltage DC input into extremely high output voltages, useful in experiments, ignition systems, and specialized applications. The table below summarizes the top ...

High-Performance Voltage Boosting Technology. This DC to High Voltage Generator Module is designed to efficiently step up a low DC voltage (3.7V-7.4V) to an extremely high output voltage of ...

The High Voltage Boost Converter is a compact and powerful module designed to step up DC 3V-6V input to an astonishing 1000KV high voltage output. This module is perfect for high-voltage ...

Buy 5Pcs High Voltage Generator DC 6-12V to 1000KV Boost Step-Up Inverter Generator Power Module at Walmart
