We offer a wide range of cabinets, wall-mounted cases, and subracks for trackside signaling electronics with designs based on standard platforms that can easily be scaled or customized to meet individual ...

Designed for connection directly to the train auxiliary supply, the inverters incorporate surge and transient filtering ensuring compliance with both the traditional and latest rail specifications and ...

This rugged, railway quality DC/AC inverter uses field proven, microprocessor controlled high frequency PWM technology to generate the required output power with pure sine wave output voltage.

LTI's inverter system is designed to withstand all transient spikes that frequently occur when rail cars pass by. All systems operate within the DC voltage range of 350 - 850VDC. These systems can be ...

Bison ProFab is a leading provider of standard and custom electrical enclosures, traffic cabinets, and specialty enclosures for the rail industry.

This small and lightweight inverter is an ideal tool for those who work in a locomotive, it is designed to securely power a laptop as well as any other device requiring 100VA or less.

The transformer-isolated Galaxy Series Rugged Inverters are designed for harsh environment rail, work train, and trolley applications.

When power generated by trains during braking cannot be fully used by other trains, S-EIV supplies the surplus power to electrical equipment in station buildings for significant energy savings.
