The following tables summarize this year's cost benchmarks and resulting LCOE values, for PV-only systems and for PV+ESS. All dollar values are inflation-adjusted to 2023 U.S. dollars (CPI-U=304.7).

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown ...

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems.

This report continues previous tracking of photovoltaic (PV) cost reductions by benchmarking the costs of U.S. residential, commercial, and utility-scale PV, energy storage, and PV-plus- storage systems ...

NLR's solar technology cost analysis examines the technology costs and supply chain issues for solar photovoltaic (PV) technologies. This work informs research and development by ...

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation.

Evolution of solar PV module cost by data source, 1970-2020 - Chart and data by the International Energy Agency.

In 2010, SETO announced unsubsidized PV price targets for 2020. Per this year's benchmarking, residential and commercial systems are 93% and 97% toward achieving the 2020 targets of 10 cents ...
