CELA specializes in wind energy, solar energy, energy storage, and green hydrogen, working with its clients in the Energy Transition

During emergencies via a shift in the produced energy, mobile energy storage systems (MESSs) can store excess energy on an island, and then use it in another location without sufficient energy supply ...

With abundant sunlight, ambitious climate goals, and a hunger for grid stability, Brazil's renewable energy sector is dancing to a new rhythm. In 2025 alone, projects like the Ilha Solteira hydropower ...

Mobile Solar Container Stations for Emergency and Off-Grid Power Designed for mobility and fast deployment, our foldable solar power containers combine solar modules, storage, and ...

Why Brasilia Needs Advanced Energy Storage As Brazil's capital grapples with rising electricity demand and intermittent renewable energy supply, innovative storage solutions have become critical. Did you ...

Discover how containerized energy storage systems are transforming industries worldwide. This article explores practical applications, success stories, and data-driven insights to help businesses ...

The project benefits more than 2 million people in Brazil. ISA CTEEP, a leader in Brazil's power transmission sector, has just energized the first large-scale battery energy storage project in the ...

The modular design allows for easy expansion,with the option to expand the battery storage system by 100 - 500kwh,making our energy storage container perfect for meeting growing energy demands. ...
