The NOVA PURE MAX 2K from RICH SOLAR is a 2000W, 24V industrial pure sine wave Inverter that is ideal for large loads that require a clean, pure source power.

The Inverter Current Calculator is a simple yet effective tool that helps users determine the current draw of an inverter based on its power rating and voltage.

To handle large power loads when initially starting an electrical device. Will drop back down to 2000W continuous supply. To charge mobile phones or smaller electronic devices at the same time as using ...

Click "Calculate" to find out the current the inverter will draw from the battery or DC power source. This calculated current is essential for battery selection, cable sizing, and protecting your electrical system ...

A 24V pure sine wave battery inverter is a special type of power conversion device that converts direct current (DC) electrical energy from a 24 volt (V) battery into alternating current (AC) electrical energy ...

The RCGP-Series Pure Sinewave DC-AC Inverters are intended for commercial, industrial or military applications wherever standard utility-like power is required at 50 or 60 Hz.

From the 24V DC outlet in your applications e.g., vehicle or boat, or directly from a dedicated 24V DC battery, this inverter can efficiently and reliably power a wide variety of household AC products, such ...

2000 Watt (2kW) 24V Industrial Pure Sine Wave Inverter with electronic overload protection, low battery voltage protection, and over-temperature protection. Features automatic shutdown for safety, built-in ...
