What types of solar inverters are available in NZ?

There are different types of inverter available. This includes inverters that can connect to the electricity grid based on your home's connection. One of the most common types of solar inverter in use in NZ, however, is the hybrid inverter.

What is a hybrid inverter?

The Hybrid Inverter enables you to optimise the amount of power you generate and consume, and minimise transfer of energy to/from the grid or generator power. You can increase the proportion of self-use energy generated by your solar system, from 20% to more than 80%!

Are hybrid inverters smart?

Hybrid inverters are smart inverters. They are able to convert DC power into AC power just like string inverters, but they are also able to manage multiple streams of electricity and intelligently send those streams where they need to go, such as to critical appliances, solar batteries, or back to the grid.

What types of inverters are available?

Our range includes grid-tied, hybrid and off-grid inverters. A Grid-tied Inverter is designed to connect to supplement your home or business' mains power. When there is solar energy to use, the system will deliver it and when there is insufficient energy to deliver, the system will switch back to grid power.

****10-Year Warranty**** SUN-30K-SG01HP3-AU-BM3 | 30kW | Three Phase | 2 MPPT | Hybrid Inverter
Higher yields / Safe & Reliable / Smart / User-friendly 100% unbalanced output, each phase High ...
