When completed, AIA will operate one of the largest self-consumption systems in an airport facility worldwide, and will be the first International Airport globally with 100% self-consumption.

The new 16 megawatt photovoltaic park for self-production and self-consumption was inaugurated today at Athens International Airport. This is the largest self-generation unit in Greece, ...

This energy storage cabinet is a PV energy storage solution that combines high-voltage energy storage battery packs, a high-voltage control box, an energy storage PV inverter, BMS, cooling systems (an ...

Athens International Airport (AIA) is on offer - expected in the following weeks - for the development of the third PV station within an airport, with a power of 35.5MW with an 82MWh battery ...

Discover how Athens-based solar companies optimize photovoltaic panel packaging to reduce breakage risks by 47% during international transit. Learn about material innovations and cost-saving strategies ...

Integrated PV Energy Storage Cabinet solutions--modular, easy to deploy, certified to international standards, supporting on/off-grid and peak-shaving applications with global delivery and support.

JinkoSolar has announced that it has entered into a Heads of Terms with Greece's KIEFER to supply its SunTera large scale battery storage solution to Athens International Airport ...

A total of 36 battery units, each with a capacity of 3.44 MW, will power a groundbreaking energy-storage project at Athens airport, totaling just over 123 MW. The project, developed by ...
