The GGD Type AC Low Voltage Fixed Switchgear is used in power users such as power plants, substations, and industrial enterprises for AC systems operating at 50Hz, with a rated working ...

Shore power solutions enable the connection of ships in port to onshore power supplies that provide electricity for on-board services allowing diesel generators to be switched off.

Explore high voltage battery packs, wall mounted lithium batteries, and ESS cabinets from Hoenergy -- your 2025 Global Tier 1 Energy Storage Provider.

Rated for 380V and a current range of 630A to 10A, this cabinet complies with the GB/T 7251.2-2023 standard, ensuring reliability in various applications. Versatile in installation, it offers both wall ...

In addition to the generating units required for safety power supply, more power generating systems such as combined heat and power stations (CHP) and renewable energy sources such as ...

Integrated and future-oriented power supply solutions for ports
Energy saving options
Diagram of a port and its properties
Smart Grids
Reduction
Deployment
Energy management
Energy procurement and in-facility generation possibilities
Software tools, products and systems
All products at a glance
Qualified expert advice in your area
Concept for every type of project
New challenge in ports
For all voltages and frequencies
SIPLINK: Siemens Power Link
New challenges for distribution grids
SIESTORAGE provides the solution
General planning
Medium-voltage switchgear
Transformers
Low-voltage distribution
Connections
Energy consumption characteristics
Planning criteria
Electric power supply design principles for a port
Example for the layout of a substation in the maximum safety category
Instrumentation and control
Operator control and monitoring
Status acquisition and control
Characteristic values
Low-voltage feeder at the double busbar system
Direct supply of important power consumers
Supply concept for shop areas
TUMETICA
Air-insulated medium-voltage switchgear
Protecting, controlling and monitoring (energy automation)
Building installations
Building control systems
Drives
Planning tools
SINCALS
SIMARIS design
SIMARIS planning tools provide efficient support
Planning power distribution
Integration is the key
Results: Results: Reference project: Qatar's new Hamad Port
The importance of electric power as an energy source for industries, buildings, and infrastructures is increasing steadily. Each business has specific needs and challenges and requires a versatile, adaptable, and tailored power supply in order to optimize availability and profitability. Totally Integrated Power (TIP)
