We deliver a complete, intelligently networked system - featuring power electronics manufactured in-house in Bocholt (Germany), high-performance batteries selected to match your project, integrated ...

It is a large multi-function smart energy storage station. Comprehensive and multi-level battery protection strategies and troubleshooting measures are in place. Various units can be easily ...

500kW power output with modular design, supporting expansion up to 1.5MWh (customizable based on your product specs). Seamless integration with existing inverters for hybrid energy systems.

HyperCube is a liquid-cooling outdoor cabinet suitable for energy storage. It features high safety, a long lifespan, high efficiency, stability, scalability, and rapid response.

This integrated solar battery storage cabinet is engineered for robust performance, with system configurations readily scalable to meet demands such as a 100kwh battery storage requirement.

It is suitable for use in microgrids, in rural areas, in remote areas, or in large-scale manufacturing and farms, as well as for charging stations for electric vehicles.

The liquid-cooled energy storage system integrates the energy storage converter, high-voltage control box, water cooling system, fire safety system, and 8 liquid-cooled battery packs into one unit. [pdf]

The SFQ Micro Grid PV Storage Cabinet SCESS-T 500KW/1075KWH/A is a high-performance storage system that prioritizes safety and reliability.
