What is a home solar system?

A home solar system is a powerful, eco-friendly solution designed to harness the sun's abundant energy, converting it into electricity for your household. This innovative system typically consists of solar panels installed on your roof, an inverter to transform the sunlight into usable power, and batteries for energy storage.

What is a solar energy system?

Beyond the panels, solar energy systems are made up of several other critical components necessary to produce and use electricity from sunlight.

What does 'go solar' mean?

When you "go solar," you get a solar panel system installed on your property--usually on your home's roof, but sometimes on your land with ground-mounted solar. Why should you install home solar panels? Homeowners go solar for all sorts of reasons.

How do residential solar panels work?

For homeowners ready to make the switch, residential solar panel installations have become more accessible and cost-effective than ever before. A solar panel system, also known as a photovoltaic (PV) system, converts sunlight directly into electricity through a process called the photovoltaic effect.

Home solar panels are rapidly becoming mainstream. We'll help you decide if a home solar panel system is right for you.
