30KW 60KW 120KW Energy Storage System ESS Integrated Cabinet LFP Lithium Iron Battery Solar Energy Storage System

“Energy storage isn't just about storing power--it's about reshaping how we consume energy. The Apia project reduces curtailment by 40% compared to standalone solar installations.”

Peak shaving and valley filling: by charging and storing energy at valley time and discharging energy at peak time, the electricity cost of customers can be reduced and the electricity charge at the power ...

The 120 kW automatic switching cabinet integrates STS-based control, protection, and monitoring functions to enable safe and automatic grid-connected and off-grid operation works with energy ...

With PVMARS solar IoT, through your phone or computer view real-time performance data of your solar system, such as solar panel power generation, battery capacity, etc., and receive timely maintenance ...

Our deep cycle LiFePo4 280Ah Battery can support 6000times cycle life and is designed especially for battery container energy storage applications to meet long warranty demand, ...

When planning an energy storage system, the focus often falls on the batteries themselves: their chemistry, capacity, and lifespan. However, an equally critical, though often overlooked, component ...

Featuring 215kWh of LiFePO4 storage and a 120kW PCS, this system is engineered for industrial parks and commercial complexes that require high-power energy management.
