The integration of a state-of-the-art DC-coupled storage system enables the project's energy yield to be optimized. In addition to that, the predictability of injection of locally produced electricity into the ...

Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed ...

Georgia is rapidly emerging as a hub for renewable energy innovation, with photovoltaic (PV) energy storage projects leading the charge. This article explores the latest developments, key players, and ...

The proposed facilities include a 200MW solar system with 200MW of battery energy storage in Laurens County, and a 150MW solar installation paired with a 150MW battery system near ...

Approved in the 2025 Integrated Resource Plan (IRP), new BESS programs include Customer Connected Solar Program enhancements and a Customer-Sited Solar Plus Storage Pilot, ...

The Georgia PSC has approved five new PPAs under Georgia Power's CARES 2023 program, totaling 1,068 MW of solar capacity, with one project also including battery storage.

The ARO liability includes the cost estimate to dismantle the solar generation site and return the land back to it's near original state, as well as the estimated cost to recycle the panels once they are ...

On this page, you can explore our database of solar projects in Georgia. Each month, we track projects in development and update our list of the largest solar projects expected to come online in Georgia.
