Our BESS (battery energy storage systems) feature a single-chassis size architecture, ensuring a compact design. The modular construction supports straightforward system expansion to manage ...

This intelligent system integrates a special bidirectional inverter, battery management system (BMS), microgrid energy controller (MEMS3000) and modular battery cabinets --all housed within a rugged, ...

Our "all-in-one" options focus on ease of use, installation and maintenance. These Australian, fully integrated, on and off-grid power systems take modularity to the next level, perfect for small, medium ...

Unlike diesel generators, BESS units use lithium-ion battery technology to deliver quiet power without diesel exhaust fumes. Site operations are safer and more efficient without the hassle of diesel-related ...

As renewable energy projects scale across Australia, the need for reliable, grid-connected energy storage has never been greater. At Australian Control Engineering (ACE), we ...

Designed for various applications, from off-grid power to backup solutions, our BESS helps optimise energy use, reduce costs, and improve system reliability. With scalable and flexible options, our ...

Our fully integrated, plug-and-play battery energy storage solutions (also known as BESS) come in different sizes, from 60 KW to 200 KW, to suit a wide range of industrial and commercial energy ...

Perfect for those who want an Australian-made BESS with Australian components. Designed for large domestic, commercial, industrial, and utility scale projects. A cluster that promotes flexible and ...
