Launched by Nuojin Solid Waste Media (hereinafter referred to as Nuojin), the Global Battery recycling Network is a global communication platform dedicated to the field of lithium Battery recycling recycling.

In this article for EVreporter, Mr. Rajesh Gupta, Founder & Director, Recyclekaro discusses how different countries are preparing to handle lithium-ion battery recycling requirements.

"This achievement of technical grade lithium carbonate at a plant scale may be the first such achievement in North America. It is critical we not only continue to develop the onshore supply chain, ...

The government should subsidise recycling, transfer technologies, automate recycling, and simplify battery design for recycling. These advances enable environmentally sustainable, efficient, ...

The recycling of lithium-ion batteries (LIB) will play a central role for Europe in the future. Both expansion projects and announcements of new recycling plants can currently be observed. This ...

By recycling lithium-ion batteries, Europe can reduce its reliance on virgin raw materials, alleviating environmental burdens associated with mining and extraction. From a geopolitical perspective, ...

Liechtenstein Electric Vehicle Battery Recycling Market is expected to grow during 2025-2031

Lithium-ion (Li-ion) batteries are found in many devices and are valuable for recycling, but they can be dangerous if not disposed of correctly.
