Can a 5G network be deployed in Belgium?

In this work, the whole method is applied to broadband RANs in Belgium for six scenarios of 5G deployment from 2020 to 2025. This paper is organized in four sections.

Why has Belgium slowed down its 5G deployment?

Several regulatory and market challenges might have slowed down its 5G deployment: Delayed 5G Auction: Belgium was among the last countries in Western Europe to allocate 5G spectrum, creating a competitive disadvantage for Brussels in network expansion.

Where is the 5G network in Belgium?

Network Research Belgium (in the 3600 MHz band) (NRB's 5G user rights were transferred to Proximus in 2024). The 5G network coverage can be viewed here. Overall, the 5G network appears to be better developed in the northern area of Belgium, in particular in Antwerp, Ghent and coastal cities, as well as in the periphery of Brussels.

Is 5G a 'weak point' of Belgium's Digital Economy?

The sluggish rollout of 5G and fibre broadband is the 'weak point' of Belgium's digital economy, as a new report by the Economy Ministry highlights that the country is lagging behind the rest of Europe.

Can a 5G network be deployed in Belgium? In this work, the whole method is applied to broadband RANs in Belgium for six scenarios of 5G deployment from 2020 to 2025.

You'll find here information regarding the actions of the BCO towards more mobile connectivity, notably 5G.

Explore the comprehensive overview of 5G regulation and law in Belgium, detailing deployment, spectrum licenses, and future plans. Discover insights now!

BIPT has published 5G coverage maps showing the progress made by operators and highlighting the role of 5G in offsetting the saturation of 4G networks. Operators are gradually ...

This Master's thesis will start from a database containing the measured energy consumption and data traffic of deployed 5G base stations in Belgium for two major operators.

We then build a prospective power model of 5G BSs by scaling 4G models with respect to bandwidth, number
