The newly founded Berlin Battery Lab (BBL) combines the expertise of the German Federal Institute for Materials Research and Testing (BAM), the Helmholtz-Zentrum Berlin (HZB) and ...

This initiative combines the expertise of the German Federal Institute for Materials Research and Testing (BAM), the Helmholtz-Zentrum Berlin (HZB), and the Humboldt-Universität zu Berlin (HU) to advance ...

On a quiet Monday afternoon, a small fire broke out in the battery assembly facility at Tesla's Giga Berlin. While local news outlets reported on the incident, the headlines of a "small fire"; ...

This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems (challenges & fires), BESS installation ...

Battery safety standards are constantly being updated and optimized, because current tests cannot fully guarantee their safety in practical applications. This is still a very serious problem, ...

On August 19, 2025, a fire erupted at Tesla's Giga Berlin battery assembly facility, halting Model Y production and forcing an evacuation.

The Berlin Battery Lab (BBL) will combine the strengths of the three partner institutions: BAM has internationally recognized expertise in battery safety and electrochemical energy materials.

Tesla's Berlin Gigafactory suffered a battery pack production fire on August 18, 2025, forcing evacuation and production halt. Analysis of the incident involving 512 battery cells and its impact on operations
