This combination of expanding storage, disciplined balancing, and growing solar capacity positions Bulgaria as an increasingly influential player in the European energy market.

Bulgaria installed 1,416 MW of new solar capacity last year, extending its run of annual additions above 1 GW to a third straight year and raising total installed solar capacity to 5,984 MW, ...

BRUSSELS - By 2025, Bulgaria is projected to be the third-largest in the European Union for newly installed battery energy storage capacity, holding a 9 percent market share, following ...

Bulgaria's solar sector added 1.4 GW in 2025 and is poised for a record 2 GW+ in 2026, driven by competitive projects and BESS integration, though high eco-taxes pose a challenge.

Bulgaria reached a critical milestone in its renewable energy transition in 2025, building 1,416 MW (1.4 GW) of new solar photovoltaic (PV) capacity -- its third consecutive year above 1 GW - bringing the ...

As Europe races toward climate neutrality, Bulgaria's surge in storage capacity signals a shift not only in national priorities but also in regional energy dynamics.

Bulgaria's Ministry of Energy has approved EUR588 million in funding for 82 standalone battery energy storage projects, totaling nearly 9.7GWh of usable capacity. The final decision, ...

The country aims to phase out coal-fired power plants by 2038 and add close to 3 GW of additional renewable energy capacity by 2030. As of the end of 2024, Bulgaria's total installed solar ...
