Does Bulgaria have a solar rebate scheme?

The Bulgarian Ministry of Energy has launched a solar rebate scheme to the tune of BGN 240 million to help households reduce their carbon footprint and put downward pressure on their electricity bills.

Does Bulgaria have a solar target?

"Bulgaria's solar target remains low as PV will only account for 2.6% of electricity in 2040," SPE said in its 2022-26 EU solar market outlook. "Yet Bulgaria benefits from high irradiation rates, notably in the south of the country, and has an important solar potential, which is not reflected in the current target."

How much solar power will Bulgaria have in 2022?

According to SolarPower Europe (SPE), Bulgaria reached 1.5 GW of cumulative installed PV capacity at the end of 2022. "Bulgaria's solar target remains low as PV will only account for 2.6% of electricity in 2040," SPE said in its 2022-26 EU solar market outlook.

Does Bulgaria have a solar potential?

"Yet Bulgaria benefits from high irradiation rates, notably in the south of the country, and has an important solar potential, which is not reflected in the current target." In 2020, SPE forecast Bulgaria to hit 3.8 GW by 2024, thereby exceeding its 2030 target.

Bulgaria's geographic diversity, combined with strong sunlight in many regions, creates excellent opportunities for solar energy, especially for residential rooftops, utility-scale projects, and agricultural ...

Residential solar, however, remains limited due to regulatory complexity and weak incentives. Household electricity prices are still regulated and account for about 40% of national ...

Incentives that the Bulgarian government has used to encourage solar power include feed-in tariffs and tax breaks for solar installations, attracting local and international investors.

As part of the National Recovery and Resilience Plan, the Ministry of Energy of Bulgaria has financed grants for households of 100% for solar thermal collectors and 70% for photovoltaic ...

The aim of the procedure is to promote the use of renewable energy in household final consumption by accessing funding to buy the best equipment for solar installations for domestic hot water and ...

It examines and scores six key areas: governance, incentives & support schemes, permitting procedures,

energy sharing schemes, energy communities and additional measures to support solar ...

With the growing interest in clean energy and sustainability, a new Grant Program is about to be launched for households to build solar PV systems under the National Recovery and ...

The ministry said on Tuesday that homeowners can now apply for financing of solar water heating systems, as well as rooftop PV systems of up to 10 kWp, which may be paired with ...
