Southeast Asia can look to Australia and Japan as examples of how to promote the adoption of energy storage systems (and, once the necessary regulations are in place, the potential speed of the rollout).

Through this article, let's take a look at the development of the energy storage markets in Southeast Asia.

China-based rolling stock manufacturer CRRC has launched a 5 MWh battery storage system that uses liquid cooling for thermal management.

Four original case studies of solar power inverter systems with lithium batteries deployed in Southeast Asia--design choices, performance insights, and how storage cuts diesel and grid costs.

Thrilled to debut our cutting-edge energy storage ecosystem at SNEC 2025 (Shanghai, June 11-13)! As an innovation leader, CRRC Zhuzhou Institute showcased full-scenario solutions ...

The 200MW battery energy storage project deployed by Shengke Group in Jurong Island, Singapore was put into operation Singapore Energy Market Authority (EMA) awarded the ...

Construction of the 285MWh giant container-like battery system was built in just six months, becoming the fastest BESS of its size in the world to be completed. As a result of the ...

Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia.
