Three phase inductors and capacitors form the low pass filters. Resonant filters are specifically designed (inductance and capacitance) to "tune" out the harmonic frequencies.

I don't think these parameters would be suitable for a nominal 60V battery, I wouldn't recommend using a 60V battery with a 48V appliance. The Voltage range for a 48V MultiPlus is 38V ...

If you're working with solar energy, electric vehicles, or industrial backup systems, pairing a 60V battery with the perfect inverter can make or break your project. This guide cuts through the confusion to ...
