How many kW can the envy power?

The Envy features a built-in generator input with AC/DC coupling, on- and off-grid capabilities, plus a 2 MPPT output allowing for a maximum of 13 kW PV array (Envy 8kW) or 15kW PV array (Envy 10kW).

How much energy does a kilowatt-hour use?

One kilowatt-hour is equivalent to using 1,000 watts of power for one hour. For example, if you run a 1,000-watt appliance for one hour, it uses 1 kWh of energy. Your local utility will track kilowatt-hours to measure electricity use and calculate your bill.

Why should you buy a Generac®; Guardian series®; home standby generator?

Generac's®; Guardian Series®; offers benefits that few competitors can match. Engineered and built in the U.S.A., the new lineup of home standby generators are engineered to save you money on installation while offering the same reliability and peace of mind you get from all Generac®; home standby generators.
