Prategli Invest is building a solar energy storage device in Tallinn, where it will store energy from a solar farm production plant located on the roof of a warehouse complex.

Hybrid energy solutions merge renewable sources, energy storage, and traditional power generation to provide a balanced, reliable energy supply. As businesses navigate the energy transition, these ...

The island state, Cabo Verde, also known as Cape Verde, relies heavily on imported thermal energy for its power supply and the energy-intensive process of desalination for clean water.

A new solar project is expected to increase the penetration of renewable energy on Cape Verde to more than 40%.

This article explores how the archipelago is overcoming energy challenges through innovative storage solutions, with insights on technology, economic impact, and lessons for island nations worldwide.

Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica Wind Farm and Battery Energy Storage System (BESS) project, which comprises an ...

Energy storage developer and system integrator Energy Vault has closed on US\$28 million in project financing for the Calistoga Resiliency Centre (CRC) located in California, US.

Notable energy storage developments for the company during 2022 included the January approval of two large-scale solar-plus-storage projects totalling 600MW PV and 480MW battery energy storage ...
