Chile has the potential to run exclusively on renewable generation, with an estimated energy mix of 46% solar, 31% wind, 12% hydroelectric, and 8% flexible natural gas power plants, as ...

Greenergy has raised financing for the fourth phase of a solar-plus-storage project in Chile set to feature 11GWh of battery storage capacity when completed.

Solar and energy storage deployment is booming in Chile, spurred on by supportive government policy that has been markedly stable for 15 years. Indeed, the nation leads Latin ...

The Desert BESS Project, developed by Atlas Renewable Energy, stands as the first large-scale, stand-alone battery energy storage system in both Chile and Latin America. With transmission lines at ...

Chile has reached fresh milestones in its energy transition amid a rapid build-out of solar and battery storage infrastructure. The context: The South American nation's brisk shift to clean ...

erano Energy has secured environmental approval to develop and operate the Catalina del Verano solar-plus-storage project in Rancagua, in Chile's O'Higgins region, located some 100 ...

To address these issues, two major developments are planned -- the large-scale deployment of battery storage and the construction of the 3 GW Kimal-Lo Aguirre transmission line.

Located in the Atacama Desert in northern Chile, this megaproject will have a total capacity of 2 GW of photovoltaic generation and 11 GWh of lithium-ion battery storage, distributed ...
