---

This world-first installation played a vital role in stabilizing the grid in Northern Chile and demonstrated the potential of battery storage to enhance grid reliability and free up generation capacity.

In March 2024, Atlas Renewable Energy announced it has signed a power purchase agreement (PPA) with Chilean mining giant Codelco for the supply of 375 GWh of energy per year, to ...

The Chilean regulatory landscape has evolved to include battery storage with last year's publication of Decree 70, which defined the rules for recognizing the capacity provided by storage ...

In the context of the financial stress caused by the DistCo PPAs for many renewable energy projects, owners of existing projects and new entrants are racing to develop battery energy ...

This article explores how lithium-ion and flow battery technologies are reshaping Chile's power grid stability, enabling solar/wind integration, and creating new opportunities for industrial and residential ...

Acciona Energia's decision to retrofit their Chilean solar plant with a massive 1GWh battery system isn't just another project announcement--it's a glimpse into how rapidly the energy ...

Storage project announcements are coming thick and fast as co-location with wind turbines offers cost efficiency and a smoother generation profile. Meanwhile, new capacity ...

Three standalone BESS with a total of more than 2.8 MWh of energy storage capacity were submitted for environmental assessment in Chile in the space of a week. Further three co ...
