Chinese solar exports at an all-time high despite drop in revenue. China's 2023 solar exports hit a record high with over 40% growth for all equipment. The surge was dominated by ...

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....

OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesChina is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

Intensifying industrial decarbonization mandates, falling module prices, and deepening financial markets are driving the China Solar Photovoltaic market toward higher-value integration ...

Since 2021, the solar photovoltaic (PV) modules market has experienced explosive growth, driven predominantly by the aggressive expansion of Chinese manufacturers, who maintain ...

Exports of solar panels from China increased by 34% in the first half of 2023 compared to the same period last year. This report analyses Chinese customs data on exports of solar ...

As one engineer quipped during field testing: "Our panels don't just absorb sunlight - they're hungry for innovation!" This drive positions CEC to lead in the anticipated \$1.2 trillion global solar market ...

China has been the largest solar PV market far and away for several years now (I'll come back to that later in a minute), but it's stunning to see that the solar market there is now more than...
