What is the telecommunication system in Colombia?

Colombia's telecommunication system consists of access to 8 different international Submarine cable systems, INTELSAT, and 11 domestic satellite Earth stations. In addition, there is a nationwide microwave radio relay system. The country's teledensity (the density of telephone lines in a community) is relatively high for Latin America, at 17 percent in 2006.

How many radio stations are there in Colombia?

Colombia has approximately 27 FM, 454 AM, and 7 shortwave radio stations.

Does Colombia have any submarine cable systems?

As of 2016, Colombia has access to the following submarine cable systems: SAC/LAN, Maya-1, AMX-1, Pan Am, SAm-1, ARCOS-1, and CFX-1. These cables land at 4 locations in the Caribbean: Barranquilla, Cartagena, Riohacha, and Tolu. One cable lands on the Pacific Ocean coast at Buenaventura, Valle del Cauca.

Does Colombia have a telecommunications infrastructure?

Colombia has a relatively modern telecommunications infrastructure that primarily serves larger towns and cities.
