The Columbia Energy Storage Project is the first long-duration energy storage project of its kind to be developed in the United States. The system's unique features will boost grid stability and deliver ...

The Columbia Energy Storage Project will feature Energy Dome's standard-frame 20MW/200MWh CO2 Battery, powering around 18,000 homes in Wisconsin for 10 hours on a single charge.

The Columbia Energy Storage Project is Wisconsin's largest remaining coal plant, but eventually it will transform into a more sustainable battery storage system.

Alliant Energy's new battery system, known as the Columbia Energy Storage Project, would be the first-of-its-kind in the United States and represents a significant advancement toward a ...

The Public Service Commission of Wisconsin has approved plans for construction of the Columbia Energy Storage Project, which uses a CO2 battery to bolster the power grid.

Plans to construct a first of its kind long-duration energy storage system of its kind in the United States are advancing following approval from the Public Service Commission of Wisconsin. ...

Energy storage has the potential to abate up to 17 Gt of CO2 emissions across sectors by 2050, primarily by supporting renewable power and the electrification of transport. Innovations in battery ...

The Columbia Energy Storage Project is the first long-duration energy storage system of its kind to be developed in the United States. The 18-megawatt project is designed to improve grid stability and ...
