Discover the Large-scale Outdoor Communication Base Station, designed for smart cities, communication networks, and power systems. Integrated with solar, wind, and energy storage ...

For offshore wind turbines, the nacelle and tower base equipment are recommended to be protected via a gas or water mist suppression system with an aspirating smoke detection system. The turbine ...

A compact, innovative, and eco-friendly aerosol fire extinguishing device developed specifically for the characteristics of distribution cabinets. It features high extinguishing efficiency, fast fire suppression ...

Installing an automatic fire suppression system, such as a clean agent, inert gas, or aerosol extinguishing system. Replacing polymer composites with advanced fire-resistant materials ...

The automatic fire-extinguishing equipment is specially designed for small spaces, such as the communication base station, and has the advantages of high pertinence, compact structure,...

This service specification (SE) applies to certification of fire protection components and fire protection systems for wind turbines exclusively carried out by DNV.

Chengwei has a variety of series of fire extinguishing devices and fire disposal systems, such as Fixed temperature-sensing self-starting water-based fire extinguishing devices, like PT1, PT4, PN2;

Minisol automatic fire suppression system is a fire suppression system that can be installed in the nacelles of wind turbines all over the world, mainly in China, Europe, and Chile. Every year, a large ...
