From pv magazine USA. Terra-Gen and Mortenson have announced the activation of the Edwards & Sanborn Solar + Energy Storage project, the largest solar-plus-storage project in the United States.

The Illvatn project, with an estimated price tag of NOK1.2 billion (US\$113 million), is expected to begin construction in 2025, targeting 2028 or 2029 for full operation.

Energy storage and smart grid solutions firm Alfen is deploying a 30MW/68MWh battery storage project in the Netherlands for commissioning later this year, the largest under construction in the country.

Vaduz's journey demonstrates that sustainable energy transition is achievable through smart solar-storage integration. As technologies evolve, this alpine capital offers valuable lessons for cities ...

Phase-change materials in construction sites now absorb thermal energy like sponges, releasing it when offices need heating. It's sort of climate-responsive architecture, and Vaduz's new post office uses ...

Discover how Vaduz's groundbreaking energy storage project reshapes renewable energy integration in microstates. This article explores technical innovations, environmental impacts, and why compact ...

Discover how the Vaduz energy storage project is reshaping renewable energy infrastructure in Europe. This article breaks down construction milestones, technical innovations, and what it means for grid ...

With 60% of Liechtenstein's electricity already coming from hydropower, the city requires smart energy storage systems to manage fluctuating supply and ensure grid stability.
