This study analyses the growth of wind energy in the most important regions of the world and make a comparison with Costa Rica.

This analysis shows that Costa Rica is a leader in wind energy in Central America and also stands out in the Latin American region and the Caribbean, but needs to overcome some challenges in the ...

PDF | On Nov 25, 2019, Gustavo Richmond and others published Wind energy: A comparison between Costa Rica and the rest of the world | Find, read and cite all the research you need on...

Costa Rica's strategy is based on a combination of hydroelectric, geothermal, solar and wind energy, allowing it to diversify its energy matrix and reduce its dependence on fossil fuels.

Comparación de la energía eólica entre Costa Rica y el resto del mudo. Revista Tecnología En Marcha, 35 (7), Pág. 19-32. <https://doi/10.18845/tm.v35i7.6330>.

Distribution of wind potential Annual generation per unit of installed PV capacity (MWh/kWp) Wind power density at 100m height (W/m²)
