Solar mini-grids are an attractive solution for improving energy access in the Democratic Republic of Congo (DRC), where the grid is very national electricity rate was around 19% in 2022.

Successful implementation is expected to spur future development of private sector green mini-grids that not only address the country's clean energy targets but also reduce the country's ...

GENI is the highest priority objective of the World Game (R. Buckminster Fuller).

The Democratic Republic of Congo's national electric-ity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access.

In May 2025, the DRC and Zambia finalized plans for a 200-km cross-border power line to bring more hydropower into the Congolese Copperbelt.

In a recently liberalized power sector, scaling up access to electricity relies heavily on the capacity of the government to properly oversee its expansion.

As the largest country in Sub-Saharan Africa by area, the Democratic Republic of the Congo (DRC) is endowed with exceptional natural resources. However, persistent conflicts and a challenging political ...

With investor backing, Nuru built the 1.3-megawatt minigrid -- interconnected last year with a hydropower grid in Virunga National Park, north of Goma, to bolster resilience -- that together power ...
