JA Solar recently launched DesertBlue, a leading PV module engineered specifically for desert and semi-arid regions.

Designed to withstand dust, heat, and high winds, DesertBlue delivers up to 650W of power with 24% efficiency, establishing a new global standard for reliable solar PV performance in ...

Standard solar panels degrade quickly in desert heat and dust. Learn the key material choices and manufacturing processes for durable, high-performance modules.

The Desert Sunlight Solar Farm is a 550-megawatt (MWAC) fixed-tilt photovoltaic power station approximately 6 miles (9.7 km) north of Desert Center, California, United States, in the Mojave Desert. It was made by the US thin-film manufacturer First Solar but now has split ownership between NextEra Energy Resources, Clearway Energy, and California Public Employee's Retirement System (CalPERS). It has the same 55...

The facility is jointly owned by NextEra, General Electric, and Sumitomo of America and reached full commercial operations in January 2015. Desert Sunlight is one of the largest PV solar plants in the ...

Saudi Authority for Industrial Cities and Technology Zones, (Modon) signed a contract with Desert Technologies, a leader in renewable energy solutions and the one of the first Saudi ...

Desert solar farms, sprawling across areas like the Mojave Desert, are not just a testament to human ingenuity but a pivotal solution in our quest for clean, solar energy.

Download our TUV certification (Test Report for Blowing Sand Modules and Cable) and find out for yourself about our high-quality solar panels in the desert. Also, feel free to get in touch with us so we ...
