Amman, April 22 (Petra) -- Energy experts have lauded the Cabinet's recent approval of a grid-scale battery energy storage system (BESS) for the National Electric Power Company's ...

For current users of solar systems, there is an increased satisfaction in their performance levels. However, energy storage is critical for enhancing the implementation of solar energy due to ...

In this analysis, I delve into the current status of Jordan's renewable energy storage sector, highlight more than five notable projects, and explore the opportunities ahead.

The Al Badiya solar power project is the first operating utility scale project in Jordan and the first battery storage project in the region. The Project was developed by Philadelphia Solar Company (PS), the ...

Jordan has adopted a new electricity law that replaces the temporary legislation enacted in 2002 and encourages investment in electricity storage and green hydrogen projects under the...

Let's be real - when you think of cutting-edge energy projects, Jordan might not be the first country that pops into your head. But hold onto your solar panels, because this Middle Eastern ...

“Energy storage isn't optional anymore - it's the backbone of Jordan's industrial competitiveness,” says Dr. Amina Khalid, Director of Jordan's Energy Regulatory Commission.

By embracing progressive policies like dynamic tariffs and decentralized solar with several connection mechanisms, Jordan demonstrates how countries can enhance energy security ...
