A new EU-wide analysis shows that rooftop solar photovoltaics could supply around 40% of Europe's electricity by 2050. The analysis provides an open access, high resolution basis for more ...

Rooftop solar panels could end up supplying around 40% of the European Union's electricity needs by 2050, according to a new EU-wide scientific analysis that highlights the ...

The newly enacted EU Solar Rooftop Standard, part of the Energy Performance of Buildings Directive (EPBD), is set to dramatically expand rooftop solar capacity across Europe.

The EU's new Rooftop Solar Standard is now official. Discover how this directive will unlock massive solar potential, reduce energy costs, and power millions of homes across Europe.

The European energy landscape is on the brink of transformation. By May 2026, the EU Solar Rooftop Standard--introduced under the Energy Performance of Buildings Directive--will require all EU ...

In one of the most sweeping moves in climate policy history, the EU passed a solar rooftop mandate that reshapes how buildings interact with energy. Starting in 2026, all new public and commercial ...

By examining the progress made and challenges faced, the report aims to provide a comprehensive overview of the current state of residential rooftop solar PV adoption across the EU, offering insights, ...

Public buildings like schools and hospitals will be particularly empowered by the EU Solar Rooftop Standard, which ensures they will benefit from solar-reduced energy expenses and ...
