Protection extends beyond earthquakes to vibrations from railways, machinery, and construction. Our EZ Seismic Cabinet is a tested, high-capacity solution engineered to keep mission-critical hardware ...

The Z4-Series SeismicFrame™ Cabinet System delivers robust seismic protection for critical infrastructure in Zone 4 seismic zones, meeting Telcordia GR-63-CORE requirements.

For Optical Distribution Frame installations, DCX Seismic Cabinets are fully configurable, front-access cabinets that serve as a high-density fiber interconnect or the main building block for a large fiber ...

We work with companies to custom manufacture seismic cabinets to fit their requirements. Working with Juniper, we manufactured this custom seismic rack to fit their MX2020 router, which is a 45RU high. ...

KabinPLUS KS 19" Data Center Seismic Rack Cabinets have been designed to offer high flexibility and efficiency with a robust and anti-seismic core construction for data centres to handle Zone 4 ...

Explore our seismic cabinets designed for maximum stability and safety. Protect your equipment with Emcore's robust solutions for seismic environments!

Seismic Rack Cabinets are engineered to protect critical IT and networking equipment in earthquake-prone areas. Built with reinforced construction, they offer stability, durability, and reliable ...

Protect equipment in any environment, regardless of geographic location. The use of seismic-rated enclosures is recommended in areas where earthquake activity or excessive vibration is possible.
