Does East Timor have electricity?

Recovery was slow after East Timor gained formal independence in 2002. By 2015, just 60% of the population had access to electricity, according to the World Bank. Efforts to electrify the country have jumped since then, with 100% of residents having access to electricity since 2021, according to the International Renewable Energy Agency.

Does East Timor need a power plant?

East Timor's current power plants, which were built with large investments from the government in recent decades, can also produce far more electricity than the country demands, lowering the imperative for the country to switch systems, Heynen said. Still, East Timor's government has expressed interest in transitioning its energy sector.

Can East Timor transition its energy sector?

(AP Photo/Firdia Lisnawati) Still, East Timor's government has expressed interest in transitioning its energy sector. In 2020, it hired energy consultants to conduct a feasibility study for supplying natural gas to the three power plants.

Is East Timor a polluting country?

Currently, electricity in East Timor is primarily generated by diesel -powered plants, a highly polluting energy source. These facilities, while essential for meeting the country's energy needs, significantly contribute to greenhouse gas emissions and harm the environment.

The country has about 270 MW of electricity capacity, 119 MW in the city of Hera. Most of the energy infrastructure was destroyed by the Indonesian militias during the 1999 East Timorese crisis. [2]

The distribution network is in poor condition, with excessive voltage drops and persistent service outages. The cost of electricity is also higher than in neighbouring countries, and Timor-Leste ...
