Can I ship lithium-ion batteries by air?

When you're shipping lithium-ion batteries by air, it's essential to follow specific regulations regarding their state of charge (SoC). The SoC, which reflects the battery's charge level compared to its full capacity, must not exceed 30% during transit.

What are the regulations for shipping lithium batteries?

Specifically, the regulations for shipping lithium batteries include requirements for documentation. These regulations are designed to ensure the safe transport of lithium batteries, as they are considered dangerous goods due to their potential to ignite and cause fires.

What are IATA guidelines for battery transport?

IATA establishes guidelines for the safe air transport of batteries, focusing on packaging, labeling, and documentation standards. These rules are designed to prevent incidents during flight, where battery failures can have severe consequences.

Can I ship sodium ion batteries on a passenger aircraft?

All packages prepared in accordance with Packing Instruction 968, Section IA and IB, must bear a Cargo Aircraft Only label, in addition to other required marks and/or labels. All sodium ion cells and batteries shipped by themselves (UN 3551) are forbidden for transport as cargo on passenger aircraft.
