Uruguay did what most nations still call impossible: it built a power grid that runs almost entirely on renewables--at half the cost of fossil fuels. The physicist who led that transformation...

A partir del 20 de julio de 2024, entrar&#225; en vigor la Resoluci&#243;n N&#176; 368/023, la cual incorpora los Sistemas de Alimentaci&#243;n de Veh&#237;culos El&#233;ctricos (SAVE) al Anexo II del Reglamento ...

OverviewElectricity supply and demandService qualityResponsibilities in the electricity sectorHistoryNotesExternal linksThe electricity sector of Uruguay has traditionally been based on domestic hydropower along with thermal power plants, and reliant on imports from Argentina and Brazil at times of peak demand. Investments in renewable energy sources such as wind power and solar power over the preceding 10 years allowed the country to cover 98% of its electricity needs with renewable energy sources by 2025.

Achieve worldwide access for your products with electrical product safety testing against the safety marks in Europe, the Americas, Asia, and the Pacific regions from SGS.

Uruguay's electricity matrix reached 92% renewables even in the year with the lowest hydro contribution on record. The robustness of the National Interconnected System (SIN) has been increased through ...
