What is a CPS ES series energy storage system?

Keep the ESS away from flammable and explosive substances. CPS ES series energy storage systems are designed for use with commercial and large-scale on-grid/off-grid power systems. Details of CPS ES series configurations are shown in the following configuration table (Table 2-1).

What is the power range of energy storage PCs?

Operating DC voltage range with full power: 750-1100 V DC. Charging and discharging: Energy storage PCS can operate in grid-forming and grid-following modes. Both modes allow battery charging and discharging. The CPS ES series ESS implements a modular design concept.

What is included in a 125 kW module?

Includes heat detector, smoke detector, and aerosol spray. Calculates the SOC and SOH and controls the contactors inside the HV control box. Each 125 kW module includes one 62.5 kW master unit and one 62.5 kW slave unit. Includes circuit breakers, surge protectors, control relays for emergency power-off button, and cabinet fan.
