Vatican City is on track to become the 8th country in the world to generate 100% of its electricity from renewable energy, following Pope Francis' announcement about plans to build a large solar plant.

To model what this could look like, he announced that solar panels would be installed on a Vatican-owned property outside Rome, and the power generated from that could supply all of ...

The project aims to meet the full energy needs of both the Vatican State and Vatican Radio using solar technology integrated with agricultural activity.

Pope Francis announces his plans to transition the Vatican to 100% solar power to support climate change efforts.

VATICAN CITY (CNS) - Pope Francis appointed two special commissioners to start work on building a dual-use solar system on a Vatican property outside of Rome that could supply the ...

The heart of this change is located at Santa Maria di Galeria, a former Vatican Radio site that has been transformed into a solar energy hub. This project was carried out by ACEA, an Italian ...

It has long been an exemplar for tackling climate change through its approach to renewable energy. Thanks to a unique photovoltaic plant installed on the roof of the Vatican Audience Hall, the Papal ...

Their new solar plant isn't just panels - it's paired with lithium-ion batteries that could make Tesla jealous. Think of it as storing sunlight in a holy water font for nighttime use.
