Enter container energy storage system air conditioning, the tech-savvy cousin that slashes bills and keeps Mother Earth smiling. Think of it as a Swiss Army knife for cooling: modular, ...

Our top-mounted air cooling system follows an advanced design philosophy that strategically places the main air conditioning unit on the container's top, maximising internal space.

This versatile line of air conditioning units offers five series of models, from 2,500 to 12,000 BTU/H, in five sizes. They feature specially designed, heavy-duty centrifugal blowers or fans that force cool air ...

It is used to provide a reliable environment with proper temperature and humidity for cabinets and containers to ensure the normal operation of equipment inside. Ultra-wide operating range, ...

The energy storage air conditioner is a temperature control product developed for outdoor power substations, power prefabricated cabins and other occasions that require heat dissipation.

The container air conditioner is specially developed for factory prefabricated modules. It's suitable for all walks of life that require factory prefabrication and modularization, such as energy, electricity, ...

Temperature sensors must be located on the top side of each hot and cold aisle within the BESS container. This positioning ensures accurate temperature readings that reflect the variations in ...

Battcool-AC series air conditioner is developed mainly for containers. It is suitable for scenarios where the ambient temperature-sensitive equipment inside the cabinet generates a large amount of heat ...
