The EU installed a record-breaking 27.1 GWh of new battery energy storage system (BESS) capacity in 2025, with Germany and Italy topping the chart again, while Bulgaria emerged as ...

On March 9, 2025, a photovoltaic energy storage facility in South Korea's Gangjin County became ground zero for the country's latest energy storage disaster. Firefighters battled flames for over 13 ...

A recent report from battery intelligence firm Accure reveals that while most battery energy storage systems (BESS) operate reliably, nearly 19% of projects experience reduced returns due to ...

Let's catch up on what happened in this fire, what the lingering concerns are, and what comes next for the energy storage industry.

Lithium-ion batteries are increasingly being used to store power for electrical grids, but some localities are concerned about fire risks.

Tesla's energy division hit record 46.7 GWh storage and \$12.8B revenue in 2025 while planning Megapack 3, Megablock, and \$20B capex.

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

February 3 - Demand for battery storage is rising on the back of massive investment in solar and wind power, wider electrification efforts and a need to strengthen grid reliability.
