One of the biggest grid batteries in California almost resumed operations Sunday following the cataclysmic Moss Landing fire in January. The San Francisco Bay Area's power grid used to ...

Let's catch up on what happened in this fire, what the lingering concerns are, and what comes next for the energy storage industry.

A fire broke out at California's Moss Landing Power Plant on Thursday. The plant, said in 2023 to be the world's largest, stores energy for the California grid.

Following a lithium-ion battery fire at the Moss Landing plant in Monterey County in California, communities nationwide are expressing concerns about hosting similar plants.

Earlier this week, Addis called on Vistra Energy to rescind its plan for a 600 megawatt lithium-ion battery energy storage facility at Morro Bay, located at the decommissioned Morro Bay ...

The first phase of the Moss Landing Energy Storage Facility, Vistra Energy's "flagship" California storage system, went up in flames Thursday afternoon, shutting down Highway 1,...

On Sept. 11, the San Diego County Board of Supervisors unanimously rejected a proposed moratorium on battery energy storage systems, which had been suggested as an option by ...
