The EU installed a record 27.1 GWh of new battery storage capacity in 2025, driven by utility-scale projects that accounted for over half of new additions as the bloc races to build the ...

The European Union is investing EUR650 million (\$766.5 million) in cross-border energy infrastructure, led by a grant for the Aguayo II pumped-storage project in Spain, alongside smaller ...

The report shows that utility scale systems have become the main engine of Europe's battery storage expansion, delivering 55% of all new added capacity in 2025 and marking a clear ...

The report, "Overview of Energy Storage Deployment in Europe," details the accelerating growth of adoption across a variety of technologies, including mechanical pumped hydro and ...

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European ...

This section outlines key EU projects, initiatives, and market trends in energy storage, highlighting efforts to integrate renewables, enhance grid stability, and support the clean energy transition.

The European Union installed a record 27.1 GWh of new battery energy storage systems (BESS) in 2025, marking the 12th consecutive year of record growth, according to SolarPower Europe's EU ...
