Envision Energy has successfully developed a two-blade turbine that matches the performance of traditional three-blade models. After 500 days of continuous operation, the turbine ...

Based on mature high-speed transmission technology of Envision, it is well-known in China for superior power generation performance and stable operation quality.

In a groundbreaking development that challenges long-standing industry norms, Envision Energy's new two-bladed wind turbine prototype has demonstrated efficiency on par with traditional ...

Envision Energy is a leading Chinese multinational green technology company, headquartered in Shanghai, that designs, manufactures, and sells smart wind turbines and energy management ...

Engineered for lightweight construction and high system-level efficiency, the turbine offers a cost-effective and scalable energy solution for a variety of green power applications. Envision's ...

Since the prototype was installed in 2013, Envision has accumulated significant product development and operational know-how, laying the foundation for its new-generation two-blade ...

Explore Envision Energy's range of smart wind turbines, Battery Energy Storage System, and green hydrogen technologies designed to drive sustainable energy transformation.

The Chinese green energy technology company has quickly grown into one of the world's largest wind turbine manufacturers. Driven by its mission to create a world of low carbon energy, Envision ...
