Discover the growth of large battery storage systems in Europe's evolving market, overcoming regulatory challenges to succeed beyond solar home storage.

This annual report analyzes developments in the European battery storage market and provides in-depth insights into key applications such as large-scale storage systems, industrial and ...

27.1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. 55% of all new capacity came from utility-scale systems, ...

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the ...

Although current capacity in these regions is EV-focused, ESS expansion is expected to follow solar's trajectory, with policy and cost dynamics driving the shift. Southeast Asia now offers the ...

SMA releases new storage system for C& I solar German inverter and battery manufacturer SMA Solar Technology AG has unveiled a modular lithium iron phosphate battery ...

Our all-in-one storage systems come pre-configured with lithium battery modules, hybrid inverter, and EMS--reducing installation time by up to 50%. No more compatibility issues or on-site surprises.

So there you have it--the shockingly bright future of European energy storage. Whether you're a policymaker, engineer, or just someone who likes keeping the lights on, 2025 is the year to ...
