-----

However, additions of new wind generating capacity have slowed in MISO, and we expect little growth in MISO wind generation through 2027, averaging just over 100 BkWh annually. ...

Here are the 25 biggest solar, wind, and battery-storage installations completed in the U.S. in 2024. Canary Media's chart of the week translates crucial data about the clean energy ...

All capacity data--including solar capacity--in this report is reported in MWac, not MWdc. This enables comparison across technologies (e.g. solar, wind, batteries, gas turbines, etc).

Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in China. The move marks a major step forward in the ...

The dataset includes projects spanning solar, wind, battery storage, hydrogen, gas peakers, and transmission infrastructure, and supports visibility into regional power investment trends across major ...

It will be co-located with the existing Fengxian offshore wind farm, making it China's first market-driven offshore "wind-solar hybrid" project. Last month, Tongwei and China Datang jointly ...

A new, floating pumped hydropower system aims to cut the cost of utility-scale energy storage for wind and solar farms.

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity.
