Official data covering Finland's smaller-scale solar installations in 2025 is yet to be published. Last June, the Finnish Energy Authority said Finland's cumulative solar capacity reached ...

The solar power plants greater than 1 MW currently being planned, under construction or in production can be viewed using the map service. In addition, the total unconnected solar power ...

After commissioning, expected in April 2024, the Lakari solar power plant will be the largest operating solar power plant in Finland with over 58,000 installed solar modules and is able to supply around ...

EPV Energy's new solar park is set to become one of Finland's largest, featuring 123,000 solar panels. ABB has joined the project as a key technology provider, delivering automation and ...

Finland's utility-scale solar capacity soared in 2025, adding a record 227 MW. The article covers major projects like Utajärvi, Europe's northernmost large-scale park in Simo, upcoming ...

Solar power in Finland is contributing to the transition towards low-emission energy production. Technological development, falling costs and climate goals have together accelerated ...

Read about solar power production, its costs and environmental effects and the project development of the solar power plant. Renewables Finland currently maintains three up-to-date lists and statistics ...

Finland deployed 227 MW of utility-scale solar last year, according to figures from Renewables Finland. The figure is a record for large-scale solar in a calendar year for Finland, taking ...
