What accessories do I need for my solar fountain pump?

We have a variety of solar pump accessories to compliment your solar fountain pump including; replacement solar pump panels and other accessories like solar pump fountain heads that add a little flair to your solar pumps.

What is a solar fountain?

A solar fountain is a fountain that uses a highly efficient solar panel and a new brushless pump. It starts up quickly, efficiently, and provides strong stability. The solar panel and pump float on the water, requiring no electric outlet or external battery.

How do I convert an electric water fountain to solar?

To convert an electric water fountain to solar, you can use a kit to bring your pond to life or create your own water fountain with this solar conversion solution. Place the panel on the ground in direct sunlight and connect the cord from the panel, the pump cable, and the LED light cable to the battery box.

What is a Solar Powered Water Feature Pump?

A Solar Powered Water Feature Pump is a device designed for use in fountains, ponds, or other outdoor settings. It functions by utilizing a 4. solar panel that must be placed in direct sunlight. Once the solar panel is exposed to sunlight, the pump can create a beautiful water effect by choosing from 1 of the 5 included spray heads.

Flexible Design: Featuring a separate design and a 9.8ft cord, this pump kit allows for DIY water features, enabling placement of the water feature in shade while the solar panel remains in sunlight.
