What is an 'off-grid' solar power system?

What is an 'off-grid' solar power system? An off-grid solar power system captures energy from sunlight and stores it in a battery bank for use in a structure which is beyond the reach of the main power grid.

How much power does an off-grid solar system need?

Typically, we recommend kits ranging from 60 to 720 watts for smaller homes, depending on how many devices and appliances need power. If you'd like further information in order to make the optimal decision regarding your off-grid small home solar system kit, you can contact one of our specialists who can guide you through the process.

How do off-grid solar power kits work?

This is then compared to what the solar systems will produce for the location you are using them. Off-grid solar power kits provide electricity in remote locations like homes, cabins, outbuildings, and other remote locations that are not served by the main power grid.

How do I set up an off-grid Solar System?

Step 1 - Add Your Appliances - The calculator is pre-populated with common off-grid appliances. Add, edit and remove appliances as needed Step 2 - Enter Sun Hours - See map below to find your zone Step 3 - Review Results - Battery Bank Amp Hours and Required PV Array will show your requirements
